The time period for reply, if any, is set in the attached communication.

Office Action Summary		Application	n No.	Applicant(s)				
		10/016,33	2	SAKO ET AL.				
		Examiner		Art Unit				
		HUY T. NO	BUYEN	2621				
	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).								
Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 73-75,77-79 and 81 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 73,77 and 81, the recitation "identification signal includes noise-like bits that have a meaning at a certain time width " is indefinite because it is not clearly point out the claimed feature and what is meant by "meaning " recited in the claims."

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 73,77, and 81 are rejected under 35 U. S. C. 102(b) as being anticipated by Schwab et al (5,134,496).

Regarding claims 73, 77, and 81, Schwab discloses a recording/reproducing apparatus (Figs 1 and 5c) for recording compressed video signals and/or audio signals and identification signal on a recording medium comprising

means for detecting a high level portion of the video signal in a predetermined time interval (Fig. 5c, column 6, lines 23-55);

means for inserting the identification in low level portion temporally before or after the detected high level portion of the video signal; and

means (10) for transmitting recording video signals and the identification signal. Further Schwab teaches wherein the identification signal includes noise-like bits that have a meaning at a certain time width that compulsorily sets a given domain to selected bits independent of a statistically represented signal (column 4, lines 45-50, column 6, lines 60-68, column 7, lines 60-68) as being recited in the claims.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 74, 75, 78 and 79 are rejected under 35 U.S.C. 103(a) as being unpatentable Schwab in view of Oguro (5,579,120).

Regarding claims 74, 75,78 and 79, Schwab fails to teach that the identification signal is detectable by statistical processing and added into low bit side of the video signals or audio signals of a high energy.

Oguro teaches adding / detecting means for adding the identification signal into a least significant bits of the samples of the video signal and detecting the identification signal from the least significant bits (column 14, lines 10-45).

It would have been obvious to one of ordinary skill in the at to modify Schwab with Oguro by using an adding/detecting means as taught by Oguro with Schwab apparatus for providing the identification in the least significant bit of the samples of the video signal I and detecting the identification from least significant bits (statistical preprocessing) as an alternative method of inserting and detecting the identification signal of Schwab.

Conclusion

Application/Control Number: 10/016,332

Art Unit: 2621

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Page 5

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUY T. NGUYEN whose telephone number is (571) 272-7378. The examiner can normally be reached on 8:30AM -6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John W. Miller can be reached on (571) 272-7353. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
